

FASITH RAHMAN M

Software Engineer

Chennai, Tamil Nadu • +91 9361103507 • fmfasith142@gmail.com • linkedin.com/in/fasith-rahman-m • fasithportfolio.netlify.app

PROFESSIONAL SUMMARY

Versatile Software Engineer with a strong foundation in core software development, object-oriented programming, and real-time intelligent systems. Experienced in building responsive web solutions, serverless workflow automation with Google Apps Script, and multi-modal AI systems integrating computer vision, speech recognition, and system monitoring.

TECHNICAL SKILLS

- **Programming Languages:** Python (Core, OOP, Exception Handling, File I/O), SQL
- **AI/ML & Prompt Engineering:** Machine Learning, Deep Learning, Prompt Engineering
- **Data Analysis & Databases:** Pandas, NumPy, Matplotlib, Seaborn, Oracle SQL Plus, Power BI
- **Tools & Platforms:** GitHub, VS Code, Google Colab

WORK EXPERIENCE

Freelance Web Developer

Oct 2026

Anitha Healthcare ([anithahealthcare.in](#)) • Remote

- Designed and built an interactive, mobile-responsive clinic website using vanilla HTML5, CSS3, and JavaScript.
- Engineered a serverless backend integration using Google Apps Script to capture patient inquiries and contact form submissions.
- Automated real-time data persistence into Google Sheets, establishing a zero-maintenance, lightweight data store for clinic staff.

Machine Learning Intern

Jul 2025 – Oct 2025

VCodez • Chennai, India

- Engineered and fine-tuned an NLP-based psychological tone analyzer for email text classification using a BERT model.
- Preprocessed, cleaned, and normalized unstructured text datasets using Pandas; built EDA visualization dashboards with Matplotlib and Seaborn.
- Evaluated classification performance across precision, recall, and F1-score metrics to optimize classification confidence.

KEY PROJECTS

AI-Powered Online Exam Proctoring System

Jan 2026 – Apr 2026

Final Year Project | Python, OpenCV, MediaPipe, YOLO, Whisper, MSS

- Engineered a multi-modal remote proctoring engine integrating video, microphone, and screen monitoring to detect suspicious behaviors.
- Implemented facial verification, gaze tracking, head-pose estimation, and mobile phone detection using OpenCV, MediaPipe, and YOLO.
- Built an audio anomaly detector with Whisper and tracked browser tab switches via MSS screen capture, maintaining an auditable event log.

Deep-Fake Image Detection Application

Oct 2025

College Hackathon | Python, CNN, OpenCV

- Developed an image classification service using Convolutional Neural Networks (CNN) to detect photo morphing and face-swap artifacts.
- Implemented image augmentation and robust input validation routines to maximize detection reliability across varied resolutions.

Mind-Ease AI Conversational Assistant

Oct 2025

National Hackathon (VIT) | Python, NLP, Sentiment Analysis

- Developed an emotion-aware conversational assistant delivering context-sensitive psychological feedback based on user input sentiment.
- Designed state-handling logic and behavioral response patterns to ensure supportive, empathetic user interactions.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering

2022 – 2026

Anna University, Chennai | CGPA: 7.5 / 10.0

Higher Secondary Certificate (HSC) & SSLC

2020 – 2022

Chennai Higher Secondary School, Tamil Nadu State Board | HSC: 74% | SSLC: 71%

CERTIFICATIONS

- Python Programming Certification (OOP, Design Patterns) — QSpiders, Chennai (2026)
- SQL & Database Management Systems — QSpiders, Chennai (2026)
- Data Analysis & Libraries (NumPy, Pandas) — QSpiders, Chennai (2026)
